LIBRARY

CONTENTS

No. 1 FEBRUARY 1955

DAVID M. PRESCOTT. Effect of activation on the water permeability of salmon eggs. Five figures	1
AURIN M. CHASE. The molecular weight of <i>Cypridina</i> luciferase. One figure	13
PAUL L. RISLEY. Autoradiographs of hamster spermatozoa. Three figures ..	21
B. G. CRAGG. A physical theory of the growth of axons. Four figures	33
LEONARD B. KIRSCHNER. On the mechanism of active sodium transport across the frog skin. Six figures	61
LEONARD B. KIRSCHNER. The effect of atropine and the curares on the active transport of sodium by the skin of <i>Rana esculenta</i> . Four figures	89
LEONARD M. LIBBER. The anticoagulant effect of adenosinetriphosphate (ATP) on blood plasma. Four figures	103
ALEXANDER SANDOW AND CHARLOTTE A. SCHNEYER. Mechanics of iodoacetate rigor of muscle. Four figures	131

No. 2 APRIL 1955

DANIEL LUDWIG AND MICHEL WUGMEISTER. Respiratory metabolism and the activities of cytochrome oxidase and succinic dehydrogenase during the embryonic development of the Japanese beetle, <i>Popillia japonica</i> Newman. Two figures	157
PAUL D. ZIMSKIND AND RICHARD M. SCHISGALL. Photorecovery from ultra-violet-induced pigmentation changes in anuran larvae. One figure	167
ABRAHAM M. SHANES AND MORRIS D. BERMAN. Penetration of the desheathed toad sciatic nerve by ions and molecules. I. Steady state and equilibrium distributions	177
ABRAHAM M. SHANES AND MORRIS D. BERMAN. Penetration of the desheathed toad sciatic nerve by ions and molecules. II. Kinetics. Five figures	199
BERTRAM SACKTOR AND GERARD M. THOMAS. Succino-cytochrome C reductase activity of tissues of the American cockroach, <i>Periplaneta americana</i> (L)	241

V. J. WULFF, W. J. FRY AND F. A. LINDE. Retinal action potential — theory and experimental results for grasshopper eyes. Three figures	247
W. J. FRY, V. J. WULFF AND MANFRED BRUST. Retinal action potential — effect of temperature on magnitude and latency in the grasshopper. Two figures	265
ERNEST B. WRIGHT, PAUL COLEMAN AND WILLIAM J. ADELMAN. The effect of potassium chloride on the excitability and conduction of the lobster single nerve fiber. Thirteen figures	273
JOSEPH V. LANDAU, DOUGLAS MARSLAND AND ARTHUR M. ZIMMERMAN. The energetics of cell division: Effects of adenosine triphosphate and related substances on the furrowing capacity of marine eggs (<i>Arbacia</i> and <i>Chaetopterus</i>). Four figures	309

No. 3 JUNE 1955

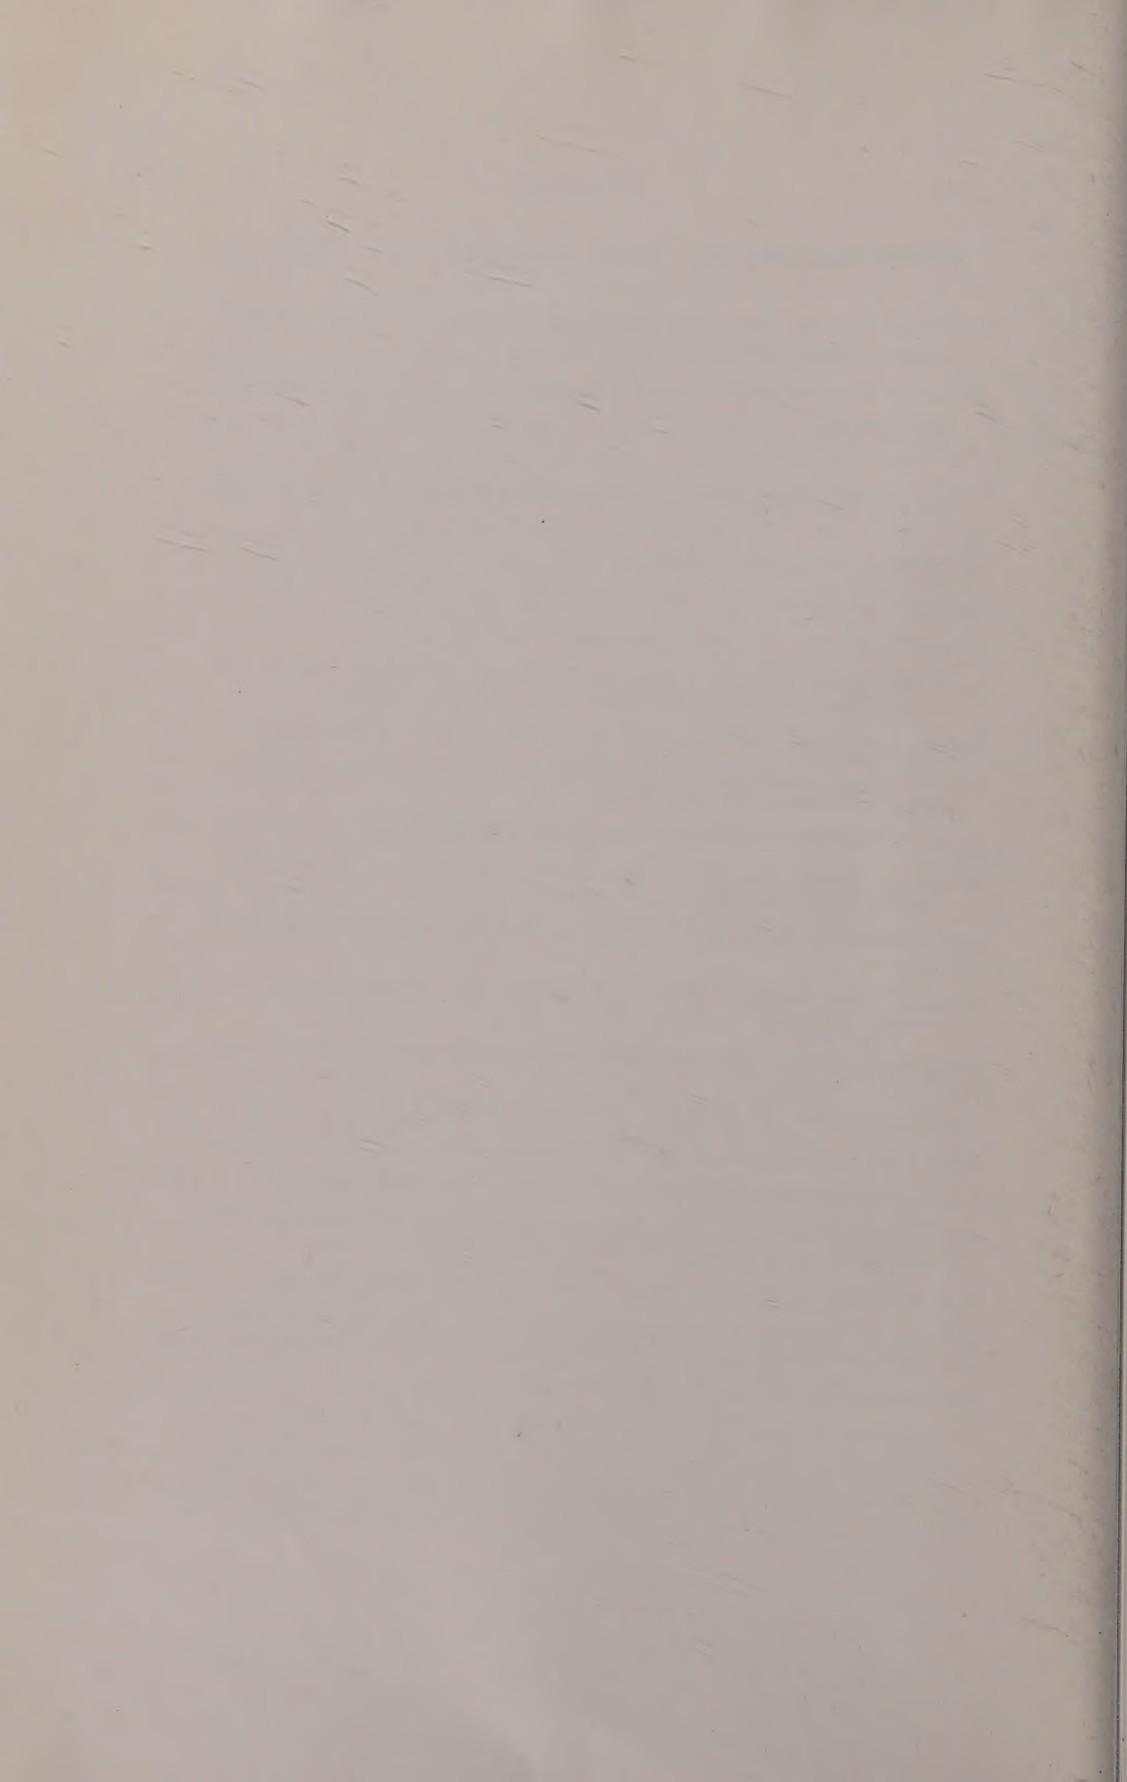

ALBERT SCHATZ AND R. RAM MOHAN. Oxidation of ammonia and urea (heterotrophic nitrification) by <i>Streptomyces nitrificans</i> . Two figures ..	331
PAUL O. FROMM AND ROBERT E. JOHNSON. The respiratory metabolism of frogs as related to season. Four figures	343
N. SONNENSCHEIN AND M. J. KOPAC. The phosphatase activities of the micro-somal (submicroscopic particulate) fraction prepared in an electrolyte medium. Four figures	361
W. H. FREYGANG, JR. AND W. M. LANDAU. Some relations between resistivity and electrical activity in the cerebral cortex of the cat. Seven figures ..	377
G. FRAENKEL. Inhibitory effects of sugars on the growth of the mealworm, <i>Tenebrio molitor</i> L.	393
MYRON LEVINE. An enzymatic comparison of two interbreeding but genetically isolated varieties of <i>Paramecium aurelia</i>	409
THEODOR VON BRAND, EUGENE C. WEINBACH AND ELEANOR JOHNSON TOBIE. Comparative studies on the metabolism of the culture form and blood-stream form of <i>Trypanosoma gambiense</i>	421
GEORGE G. BERG. Inorganic polyphosphatase in the developing frog. Eleven figures	435
A. S. V. BURGEN. The osmotic work of salivary secretion in the dog	465
<i>Comments and Communications:</i>	
EDWIN E. GORDON, MELVIN SPIEGEL AND CLAUDE A. VILLEE. An insulin effect on sponge metabolism. One figure	479
KEICA NISHIE AND E. J. HARRIS. Electrolytes in the tissues of <i>Electrophorus Electricus</i> , L.	484

SUPPLEMENT No. 1 TO VOLUME 45, APRIL 1955

WOLFGANG KÖHLER, WILLIAM D. NEFF AND JONATHAN WEGENER. Currents of the auditory cortex in the cat	1
WOLFGANG KÖHLER AND JONATHAN WEGENER. Currents of the human auditory cortex	25

SUPPLEMENT No. 2 TO VOLUME 45, MAY 1955

<i>Introduction</i> — Alexander Hollaender	ix
ROLLIN D. HOTCHKISS. Bacterial transformation	1
NORTON D. ZINDER. Bacterial transduction. Four figures	23
A. H. DOERMANN, MARTHA CHASE, AND FRANKLIN W. STAHL. Genetic recombination and replication in bacteriophage. Three figures	51
JOSHUA LEDERBERG. Recombination mechanisms in bacteria. One figure	75
J. D. WATSON. Biological consequences of the complementary structure of DNA. (Abstract and Discussion)	109
DAVID D. PERKINS. Tetrads and crossing over. Seven figures	119
EDWARD NOVITSKI. Genetic measures of centromere activity in <i>Drosophila melanogaster</i> . Two figures	151
DREW SCHWARTZ. Studies on crossing over in maize and <i>Drosophila</i> . Four figures	171
MAURICE WHITTINGHILL. Crossover variability and induced crossing over. Seven figures	189
HAMPTON L. CARSON. Variation in genetic recombination in natural populations. Three figures	221
A. H. STURTEVANT. Evaluation of recombination theory	237
KARL SAX. Evaluation of recombination theory	243
ALEXANDER WEINSTEIN. Unraveling the chromosomes. Eight figures	249
NORMAN H. GILES. The oxygen effect on radiation-induced chromosome aberrations: breakage-versus-recombination hypotheses	271
C. P. SWANSON. The oxygen effect and chromosome breakage. One figure	285
WILLIAM K. BAKER AND ELIZABETH S. VON HALLE. Evidence on the mechanism of the oxygen effect by use of a ring chromosome. Three figures	299
<i>Discussion</i> of the last three papers. Two figures	309

INDEX

- A**BERRATION: breakage-versus-recombination hypotheses, the oxygen effect on radiation-induced chromosome Sup. 2
 Activities on the water permeability of salmon eggs, effect of
 ADELMAN, WILLIAM J. See Wright, Ernest B.
 Adenosine triphosphate and related substances on the furrowing capacity of marine eggs (*Arbacia* and *Chactopterus*), the energetics of cell division: Effects of Adenosinetriphosphate (ATP) on blood plasma, the anticoagulant effect of American cockroach, *Periplaneta americana* (L), succino-cytochrome C reductase activity of tissues of the Anticoagulant effect of adenosinetriphosphate (ATP) on blood plasma, the
 Anuran larvae, photorecovery from ultraviolet-induced pigmentation changes in (*Arbacia* and *Chactopterus*), the energetics of cell division: Effects of adenosine triphosphate and related substances on the furrowing capacity of marine eggs Atropine and the curares on the active transport of sodium by the skin of *Rana esculenta*, the effect of Auditory cortex, currents of the human Sup. 1
 Auditory cortex in the cat, currents of the Sup. 1
 Autoradiographs of hamster spermatozoa Axons, a physical theory of the growth of
BACTERIA, recombination mechanisms in Sup. 2
 Bacterial transduction Sup. 2
 Bacterial transformation Sup. 2
 Bacteriophage, genetic recombination and replication in Sup. 2
 BARKER, WILLIAM K., AND ELIZABETH S. VON HALLE. Evidence on the mechanism of the oxygen effect by use of a ring chromosome Sup. 2
 BERG, GEORGE G. Inorganic polyphosphatase in the developing frog
 BERMAN, MORRIS D. See Shanes, Abraham M.
 Beetle, *Popillia japonica* Newman, respiratory metabolism and the activities of cytochrome oxidase and succinic dehydrogenase during embryonic development of the Japanese
 Biological consequences of the complementary structure of DNA. (Abstract and Discussion) Sup. 2
 Blood plasma, the anticoagulant effect of adenosinetriphosphate (ATP) on
 271 BRAND, THEODOR VON, EUGENE C. WEINBACH AND ELEANOR JOHNSON TORIE. Comparative studies on the metabolism of the culture form and
 1 273 Breakage, the oxygen effect and chromosome Sup. 2
 309 Breakage-versus-recombination hypotheses, the oxygen effect on radiation-induced chromosome aberration: Sup. 2
 103 241 BURGEN, A. S. V. The osmotic work of salivary secretion in the dog
 103 CARSON, HAMPTON L. Variation in genetic recombination in natural populations Sup. 2
 167 221 Cat, currents of the auditory cortex in the Sup. 1
 Cat, some relations between resistivity and electrical activity in the cerebral cortex of the
 309 Cell division: Effects of adenosine triphosphate and related substances on the furrowing capacity of marine eggs (*Arbacia* and *Chactopterus*), the energetics of
 89 25 309 Centromere activity in *Drosophila melanogaster*, genetic measure of Sup. 2
 1 21 151 Cerebral cortex of the cat, some relations between resistivity and electrical activity in the
 33 377 Chactopterus), the energetics of cell division: Effects of adenosine triphosphate and related substances on the furrowing capacity of marine eggs (*Arbacia* and
 75 23 309 CHASE, AURIN M. The molecular weight of *Cypridina luciferase*
 1 51 13 CHASE, MARTHA. See Doermann, A. H. Sup. 2
 299 51 51 Chloride on the excitability and conduction of the lobster single nerve fiber, the effect of potassium
 435 273 Chromosome aberration: breakage-versus-recombination hypotheses, the oxygen effect on radiation-induced Sup. 2
 177 271 Chromosome breakage, the oxygen effect and Sup. 2
 157 285 Chromosome, evidence on the mechanism of the oxygen effect by use of a ring Sup. 2
 109 299 Chromosomes, unraveling the Sup. 2
 COLEMAN, PAUL. See Wright, Ernest B.
 103 249 Cockroach, *Periplaneta americana* (L), succino-cytochrome C reductase activity of tissues of the American
 241 273

- Comparative studies on the metabolism of the culture form and bloodstream form of *Trypanosoma gambiense* 421
- Conduction of the lobster single nerve fiber, the effect of potassium chloride on the excitability and 273
- Cortex, currents of the human auditory Sup. 1
- Cortex in the cat, currents of the auditory Sup. 1
- Cortex of the cat, some relations between resistivity and electrical activity in the cerebral 1
- CRAGG, B. G. A physical theory of the growth of axons 377
- Crossing over in maize and *Drosophila*, studies on Sup. 2
- Crossing over, tetrade and Sup. 2
- Crossover variability and induced crossing over Sup. 2
- Culture form and bloodstream form of *Trypanosoma gambiense*, comparative studies on the metabolism of the 189
- Curares on the active transport of sodium by the skin of *Rana esculenta*, the effect of atropine and the 421
- Currents of the auditory cortex in the cat Sup. 1
- Currents of the human auditory cortex Sup. 1
- Cypridina luciferase*, the molecular weight of 25
- Cytochrome oxidase and succinic dehydrogenases during embryonic development of the Japanese beetle, *Popillia japonica* Newman, respiratory mechanism and the activities of 157
- D**EHYDROGENASE during embryonic development of the Japanese beetle, *Popillia japonica* Newman, respiratory mechanism and the activities of cytochrome oxidase and succinic 157
- Desheathed toad sciatic nerve by ions and molecules, penetration of the 177
- DOERMANN, A. H., MARTHA CHASE AND FRANKLIN W. STAHL. Genetic recombination and replication in bacteriophage Sup. 2
- Dog, the osmotic work of salivary secretion in the 51
- Drosophila melanogaster*, genetic measure of centromere activity in Sup. 2
- Drosophila*, studies on crossing over in maize and Sup. 2
- E**FFECT of activities on the water permeability of salmon eggs 1
- Effect of atropine and the curares on the active transport of sodium by the skin of *Rana esculenta*, the 89
- Effect of potassium chloride on the excitability and conduction of the lobster single nerve fiber, the 273
- Eggs (Arbacia and Chaetopterus), the energetics of cell division: Effects of adenosine triphosphate and related substances on the furrowing capacity of marine 309
- Eggs, effect of activities on the water permeability of salmon 1
- Electrical activity in the cerebral cortex of the cat, some relations between resistivity and 377
- Electrolytes in the tissues of *Electrophorus Electricus*, L. 484
- Electrolyte medium, the phosphatase activities of the microsomal (submicroscopic particulate) fraction prepared in an 25
